SAIS Bulletin - 22 May 2023. National Science Day - 28 Feb. It is internationally celebrated on the Friday of February 28th. As the name of this festival indicates, it is also known as International Women's Day. The day was established on March 19th, 1909 by the Socialist International, an organisation of labour unions. The idea for the day was proposed by a Russian named Clara Zetkin. The day celebrates and commemorates the social, economic, and political achievements of women in history. Why is International Women's Day on the Friday of February 28? What does it mean? When is International Women's Day? The answer to all these questions can be found on the Internet. Here we give some links to useful information. You can also get here some facts about this topic from here. The answer to the last question is very simple - March 19th, 1909 was International Workers' Day, and as the day of celebration of working women is falling on the Friday of February 28, International Women's Day should also be celebrated on that day. Here is the answer to the first question. The day for celebrating International Women's Day was established in 1909 by the Socialist International, an organisation of labour unions. The idea for the day was proposed by a Russian named Clara Zetkin. The day is celebrated on the Friday of February 28th. In a city of Chicago, many beautiful and unusual flowers grow here and there.
